PERSONAL BULLETIN SERVICE
Bulletin No. Four

DEAR ASSOCIATE:

It has been two years or more since we sent out the first of these personal bulletins - and this is only No. 4. But as you all understand, the Bulletins were planned as a kind of emergency service, to be used only if some sudden and rigid censorship were imposed or our regular publications discontinued.

We have sent you a few extraordinary items, such as the landing of the Discs at Muroc Base - which we have never been able to prove but believe to be authentic, and s everal 'saucer' publications have 'folded', believably at the suggestion of the powers that be, but no drastic emergency has so far occurred. I am sending out this NO.4 partly to let you all know that the service has not been discontinued -- and mainly because the seeming lull in 'saucer' activity (i.e., in the reports) is itself very ominous. There is a quiet and unofficial censorship which grows tighter week by week - and this can mean only that there is something of importance to be kept from the public.

UFO sightings have NOT decreased, and they continue to come from all parts of the world. They have NOT been discredited and they have NOT been explained, by the armed forces, by government authorities, or by scientists. The old-time twaddle of a decade past is being served up again, and is even more insulting than ever before to any informed and intelligent reader. New forms of the phenomena are appearing - notably, of late, the reports of the "little men", or "little green men", in the United States, Europe, Central and South America, and Australia (not really "new", of course, but in line with earlier happenings). And there is a disquieting correlation between air disasters and the UFO activities. One could continue in this vein for many pages.

Our information about the little green men is to the effect that these beings are a type of Elementals, who exist everywhere on the etheric levels. There is considerable information in occult literature about these entities, but be careful about mentioning such an idea to -- well, to almost anyone, or he, she or they may choke to death with either laughter or indignation . . . We are also told of late that "all is not milk and honey among the Etherians" - which indeed has been obvious for some time - to some people.

The new conspiracy of silence (which itself is very gabby) is beginning to take the form of an attack on ALL kinds of supernormal events and powers, such as telepathy, clairvoyance, spiritistic or 'spiritoid' phenomena, anything and everything verging on the 'occult' or 'metaphysical'. I do not wish to use sensational terms, but nevertheless there is a kind ofgathering together and marshalling of the Powers of Darkness - of the hosts of an old-and-crude but dangerous materialism, false but alluring, making a final desperate stand and sally from the "Fortress of Man-Soul". All these facts are written in large letters - but there are tens of millions of human beings who cannot and do not want to read them.

This old but militant evil gains strength because it seems to (and does) fit in with a superficial scientism, carries no threat to religious dogmatism, and disturbs the old ways of life not at all. Yet it is doomed as surely as the "adamantine chains" and the lake of brimstone. And this feeling that there is now a hurry-down of events toward some near culmination steadily gains ground and is not to be taken

lightly. The 'Signs of the Times' (whatever they may signify) are too many and too insistently about us. The efforts to conceal them and to distort their nature simply emphasize them the more - for all who are able to read, to think, and to learn.

In illustration of this I quote by permission the following editorial.

Whether the approaching perihelion of Mars has any considerable bearing on this probable climax is as yet uncertain. Similar near-crises have come and gone heretofore.

Nevertheless it seems impossible that the totality of conditions and circumstances (of the globe and of the etheric incursion) should remain in its status quo. Everything is in motion, in action, in change of forms, forces, energies, magnitudes, frequencies. This tide of cosmic happenings can hardly cease to flow, nor can we conceive that its ebb would reconstitute the drowned worlds of the past.

-- EDITORIAL --

Robert J.Gribble
Editor, Flying Saucer Review *

The calm in the background is not a natural phenomenon. It is man-made. As the lid of censorship over 'saucer' news comes down tighter and tighter and the news of saucer activity becomes less and less to the public, the calm begins to seep into the minds of both the sceptic and the believer. For the sceptic, this man-made calm provides further fuel for the doubt which seems to be acting as a support against information which might shake loose their belief that the Flying Saucers are just so much bunk.

For those who huddle round this shaky calm, believing that they are right and the believer wrong - to these people I would recommend a good supply of nerve pills. Their cocky smugness will be short-lived. The dam of ridicule which has held back the flood of truth is cracking. The mountain of excuses which was stored up against saucer incidents has now been exhausted. The great fog which has shrouded the truth for the past eight years is beginning to lift.

To the believer the great calm has, in many cases, been responsible for a change of thought. One might say they have been put in the position of 'wondering whether the Saucers really do exist'. To these people I do not recommend the nerve tablets, just a little patience. The time is not too distant when you will have the opportunity of saying, 'I told you so.'

Many events are now taking place which lead us to believe that this is the calm before the big storm. The Air Force is now setting up hundreds of new ground observer stations, many as far south as Arizona and New Mexico. We find it hard to believe that this move has been prompted by a turn for the worse in the international situation. We have been told that the observers at these lookout stations are receiving orders to report anything that moves in the sky,** whether it

*Note: The Review is published monthly. PO Box 441, Seattle 1, Washington. The editorial quoted appears in issue for October, 1955, Vol.1, No.10. About 25 pages of excellent "saucer" material. $3.00 per year, US & Canada.

** National security is the obvious public explanation for all such precautions, which are really understood only at top command levels. ml

looks like an airplane or not. Merchant ships on the Pacific were asked by the Navy to report immediately all unidentified flying objects. Fishing vessels and other private craft were asked to make similar reports.

We feel that this great calm is the forerunner of something big. With the close approach of Mars in 1956 many investigators feel that our globe is due for a mass surveillance by these space visitors. Since 1947 each time Mars has moved close to our planet the sightings have increased. In September 1956 it will move closer than ever. If there is life on Mars or Venus, or if these two planets are being used as a base by visitors from another solar system, then the present preparations on our planet have a purpose.

There is much more 'cooking' behind this calm. The national wire services, bless their yellow spines, are bowing to the great father's "request" not to send out saucer stories without official permission. The big city newspapers have become more touchy about publishing 'sightings'. All in all, some one, we can't imagine who, is preparing a defense for something big.

Behind the calm and unknown to the public, is the blunt fact that the saucers continue to be seen throughout the world, and in America in particular. Stay tuned to Flying Saucer Review.

- end -

(Editor Gribble's confidence in coming events is such that he is reorganizing his entire publishing set-up and asks for your interest and support - which seems to me well deserved.

(As to this Personal Bulletin service - several hundred Associates have sent us, as we requested, stamped and addressed envelopes - No. 10 size, 9½ x 4" - and of these we have now used only four. Other Associates may of course do likewise, but we shall, reluctantly, have to suggest that a dollar or so donation to this phase of the BSR work would be most welcome. Please note that this is NOT a regular news service. It is a plan to be used "in case" we have something to say that seems important, and which for ANY reason we withhold from our bi-weekly Clips & Quotes and/or our bi-monthly Round Robin.

(We will not devote the Personal Bulletins to sightings, reports and phenomena of the aeroforms - for this is competently done by a number of small periodicals. The idea is, that one single alarming flare-up of events may start ALL 'Saucer' publications on their way to the underground - but an individual mail service MAY survive, pro tem at any rate. -- And while I think of it, we have Regional Directors in ten States and may have to ask some of them for help (not financial) if office work continues to increase.

Recurring to our interpretation of the Aeroforms - this is steadily gaining ground, and should be made known, or made accessible to as many persons of the 'right sort' as possible - especially to open-minded publicists. If you can make good use of a few of our mimeographed summaries, let us know here at Hdqrs.

DIVOBEQUA - which is our way of writing "May the Gods prosper all that you do - (Di vortant bene quod agas)

ML.
